THE ALLIANCE.

Our telegrams amounes that the "Daily Telegraph" is advocating the strengthening of the Anglo Japanese alliance, and we are told that this policy of our London contemporary is receiving general approbation in the City. Our present tracty with Japan may be taken to express the accepted policy as far as son-

cerns the matters with which it deals. By it Grant Britain recognises Japan's interests in Chins, her special interests in Manchura; and her right to take steps to protect them. It stipulates that if in the protection of the interests Japan should be at war with a third Power Great Britain will be neutral, and that if during such war any other Jower should join against Japan these Britain will then take part in the war as the why of Japan The war new going on it covered by the treaty. Great Britain is neutral, but if any Power should come to Reseats sensitions Great Britain must assist Japan. The treaty, as has just been said, represents the accepted policy, But it does not constitute a point, for it is merely a fragment, dealing with specific interests and specific eventuations. It provides cortain means for facilitating the defesses of interests and specific overtexanties. It provides contain means for facilitating the defence of Japanese and of British interests in the Far East. The eventualities which it contemplate, however, are only a part of those which may happen; perhaps not the most immediately probable part.

In view of the recent victory of Japan, it

probable part.
In waw of the recent victory of Japan, it might not be improbable that the Russan autocracy, in order to save itself from revolution at home, would exert itself to the unnot to obtain help from such exert. This contingency, though not highly probable, is quitte within the hounts of possibility, and for that event the Brit h nation ought to be propared, and the Government in partendar ought to be in every respect ready. Readiness mosen having decided betweendon to hencessary plans of campaign, including all arrangements and the forests to be used, and not having when the time cames to sat does and deliberate if anything it to be done, and if so what it is to be few would be natural to suppose that start in hourshess of the Cabinets on the subject of its new disponition of our naval equation. Quamitoe of Delence, as Was Other Camella, and all its other military "reforms," the Government is now reary for anything, and that if at any moment any Power or Terrors should show signs of lifting a singer against Japan the order would be given and the Britah Pleats be mat tay on the way to be anything the Britah Pleats be mat tay on the way to be seen the properties of the seen uncome to consult and the properties of the properties. the British Fiscots on next cary on the way a their posts. But experience shows that the assess which have been unready once are quite capable of being unready again. The treaty with Japan also touches on other possibilities. It refers to British unready in

possibilities. It refers China which are we maintenance being, i pose in making the

pose in making the event—we do not say t Russia's being able to reverse the situation by a satisfactory reproduction of Poltava, Japan would not be able to contribute to the per-tection of British interests; and Russia, would if account in the present enterprise, would reserve for more formidable than even in the reserve for more formidable than even in the contract of the present enterprise, would reserve for more formidable than even in the contract of the present enterprise. if successful in her present enterprise, wede energe far more formidable than ever in the Far East and throughout Asia, would hard remonere those of her designs which as' thought to be inconsistent with British it terrats. How in that event is the assertime protection of British interests in the Far East and in the rest of Axia to be effected if Taxi-only one half of the problem of British policy in second to Axia to other half being covered. only one half of the problem of British in in regard to Asia, the other half being or by the question—What are British intel-Asia. I But as soon as the problem in a this form it expands, for it is seen to more fraction of the general problem—I are British interests and how are they protected. That is in a nuckell the per of British policy, about which the one portant fact is that it hardly ever is

THE CRIMEAN DISTURBANCES. VIOLENT OUTBREAKS IN CAUCASUS

YALTA (Crimea), March 28. The disurbances began here on Sunday evening when the town was ignited in five I'be crowd obstructed the work of extinguishing the flames. All the police sta tions were wrecked and the prisoners liberated The strempt to sack the municipal treasury was frustrated.

ST. PETERSBURG, March 28. Violent outbreaks are occurring in many parts of the Caucasus both in the town and country. The peasants declare that they can only obtain concessions by force, and they are,

therefore, attacking the municipal buildings and the country seats of the nobles. The Government is sending troops into the district. There is a marked recrudescence of unrest throughout Russia, apparently in pursuance

of a "mot d'ordre." YALTA, March 28. Warships and military rei forcements have arrived here. Order has been restored. (R.)

A.L.M. & D.S .- At the Sailors and Soldiers' Institute last night, a lecture was given under the auspices of the above society by the Rev. Reginald Rynd, B.A., on "The Natural Use of the Voice." A great deal of valuable information was conveyed by the lecturer as to the proper mode of developing the vocal organs, and his description of the various resonant organs of thehi very lucidly described—was rendered still more plain by a large diagram of the head and throat. The importance of the proper management of the resonant organs, and the way in which to best avoid the hindrances to good singing, presented by the tengue, throatiness, etc., were fully set forth, and at the close of the lecture the appreciation of the audience was plainly expressed. A vote of thanks to the reverend lecturer was proposed by Admiral Sir Massie Blomfield, K.C.M.G., who presided, and was heartily accorded. We hope that Mr. Rynd will favor the society with many more of these interesting contributions to the proper understanding of music, notwithstanding the dis-corragingly small number of members who formed up last night.

TITRIBLE ACCIDENT.

THREE MEN BURIED ALIVE.

terrible accident occurred at Alexandria ye-tenday afternoon about 5 block, by which three men lost their lives.

In Stamtoul street, just behind Groppi's stablishment, building operations are proceeding, and at the time mentioned the founds tions of the house being built gave way, bury ing three native masons in the débris. Towards evening, the dead bodies of two of the men were recovered, while the other remained buried under a mass of earth and stone.

From investigations which we have made, it pears that at a depth of four metres these ien were engaged in building up the earth in the form of an ar. b. The carelessness of native workmen is not rious. It seems that in formng the arch they had taken away some earth on the side of the escarpment. This weakened the layer of earth on top and caused the andslip.

Under the circumstances the blame for the unfortunate accident must fall on the victims themselves, as no one but they can tell the stability of their position. Had they been simple workmen, the responsibility would lie with the employers, who should have capable overseers.

AL AZHAR UNIVERSITY.

The titel ulma of the Al Azhar University, Sheikh Ahmed el Hanbali, has re-signed his seat in the council of directors of the University. Two sheikhs only remain, Sheikh Hassanein El Boulaki and Sheikh Hassanein El Edoui.

We har on good authority that candidates for cadi hip will in the near future, after passing an examination at Al Azhar at an early period of their studies there, go through a special course of training which will be entirely independent of the ancient university.

UPPER EGYPT HOTELS COMPANY.

Referring to the announcement which appeared in our columns yesterday, we are informed that the Savoy Hotel, As-ouan, will not now be included in the above company, as stated, owing to the fact that the necessary arrangements have not been concluded with the Auglo-American Company.

The capital of the new company is £220,000. in shares of £4 each, and £100,000 in 5 % first mortgage debentures. The directors will be Mr. A. E. Harrison, general manager of Messrs. Thos. Cook & Son, (Egypt), Ltd., George Nungovich Bey, Mr. Charles Baehler, and Mr.

STATE OPERA.

We I car that a petition is circulating among the abonnés of the Khedivial Opera House (and obtaining numerous signatures), copies of which will be addressed to the Minister of Public Works and to Lord Cromer, Mr Corbett and Sir William Garstin Vincent The petition deals with the decision of the Société Artistique to bring an Italian company over in the season 1905 1906, in spite of the decision taken some time ago, and approved by the Government, to bring French companies over in alternate years. The signatories of the petition complain of this breach of the regulation , pointing out that the arrangement previously made enabled good new operas which by the concession must be produced to the number of four a-year) to be brought lefore the Cairo public. They disclaim all nationalist bias and a sert that the plea of the Société Artistique, viz., that a good French company cannot be procured, is utterly untenable. They therefore beg the Minister of Public Works to intervene on behalf of the Government and the public.

In our opinion the best way out of the difficulty would be to revoke the concession as soon as possible, and hand over the entire business to a good impresario. The proverb "Too many cooks" is alarmingly true in Egypt,

CAIRO ZOOLOGICAL GARDENS.

Many additions have been made to the me nagerie in these gardens during the last two months, and one of the prettiest sights now to be seen near Cairo is that of the young gazelles and ibex, of which more than a dozen have recently been born at Ghizeh, playing and frisking about with their mothers in the large paddock which occupies the site of the ruins of the old palace. The births this spring also during his stay." include an Arui wild-sheep and two Hedjaz sheep, and among the birds, besides numerous doves of various kinds, two buff-backed egrets have been hatched and reared.

Seventeen animals have been presented : an Egyptian weasel by Mrs. Colville, a hawk-eagle by Mr. H. Raczinski of Alexandria, a Nilotic waran-lizard from Luxor by Prof. Dr. G. Schweinfurth, a ring-necked parrakeet by Mrs. Bazil, three slender lorises by Mr. J. A. Tarrell, a jungle-cat by Mr. A.E. Branch, seven trumeter bullfinches and a spotted cuckoo by Mr. G.H. Malcolm, and a greyheaded love-bird by Mr. S. Hauauer. The purchases during the same period include a yellow baboon, a very large bonnet-monkey, a white nosed red monkey, some lemurs, two species of Egyptian foxes and two species of wild cat, a Loder's gazelle from the Fayoum, a mouse-deer from I dia, several pretty species of birds not previously represented in the collection, as the lavender finch of Tropical Africa and the Pekin nightingale, also two Mina birds, and finally an Algerian tortoise.

By the kind permission of the Inspector-General of Prisons, the band of the Ghizeh Boys' School will play on Friday afternoons in the gardens throughout this year,

THE SIRDAR AT SUAKIN.

RECEPTION BY INHABITANTS.

(FROM OUR CORRESPONDENT).

Suakin, March 16. During his recent visit to Suakin, the Sirdar distributed several robes and swords of honour, and other valuable gifts, such as medals, dresses, watches, revolvers, knives, and shaving articles, to a large number of sheikh of tribes, clergy, and faithful guides and attendants for their loyal services these few years to the Government. After this ceremony was over he delivered an el quent address in English which lasted 45 minutes, and which was then interpreted into Arabic by his Arabic secretary, Shaheen Bey, and afterwards again interpreted into Hadehdow by the Commandant of Police, Mohamed Bey Ahmed. In the evening his Excellency was enter-eined at dinner at the Moudirieh. Afterwards

a reception was held, when Saghcolaghassi Aly Effendy Ahmed, Deputy-Inspector of Suakin Moudirich, addressed his Excellency the Sirdar in English as follows: "Your Excellency,—I have been chosen by the Egyptian officers, officials and employes of the Government in Suakin to stand respect fully before your Excellency and to express their happiness on your visit to this pro-vince and town. All the people of whatever station, the richest and the poorest, the highest and the lowest, have taken this op portunity to welcome you by their shouts and to respond to the consideration and good will you have ever shown to all. All whom you find around you are anxious to assure you of their warm feelings and pleasure The whole Sudan recognises and is grateful for the wise and good administration of the country. The whole Sudan recognises and is grateful for the manner in which the happiness and well-being of all classes are considered. Not only the whole Sudan, but the whole world recognises the splendid way in which the country has thriven during the years in which you have been Sirdar and Governor General of the Sudan, and wonders at the magnificent manner in which the resources of the country are being develop ed. It is true that during this period all departments of the Government complished much, but in this province we watch perhaps more keenly than others, the of railway which are joining the Nile miles and Red Ses, and the plans for the development of the ports of the Sudan. We know that all that has been the result of your master spirit and encouragement. I am not able to express all that is in my mind, but specially we would thank your Excellency for the honor of your visit to us this evening, and in this way showing that you have a warm heart and kind feelings for all those serving the Government of this country. I ask all who are present to drink the health of his Excellency the Sirdar of the Egyptian Army and the Governor-General of the Sudan, El Ferik Sir Francis Reginald Wingste Pasha."

The following congratulatory order was ublished after the Sirdar's departure

El Miralai Howard Bey, Com. Suakin and Moudir Snakin Province. "I am desired by the Sirdar and Governor General to express his entire sati-faction with all that he saw at his inspection of the Suakin Province. He is glad of this opportunity of thanking El Miralai Howard Bey, Mr. Kerr, and the military officers and officials of the Egyptian Army and Sudan Government for their admirable arrangements for his reception, and their good and hard work to which the very marked improvement in the condition and progress of the town and province since his

ast inspection in 1901 is due,
"He was much struck with the smartness and turn out of the guard of honor furnished by the 3rd Battalion, and the excellence of the organisation and the careful arrangements made for the treatment of the sick in the military and civil hospitals.

"The interest taken in education, as evinced by the satisfactory state of the school and scholars, was most marked.

"He also wishes you to convey to El Miralai Macauley Bey his great appreciation of the hard and valuable work done by him and his staff on the new Railway, of which the substantial progress already made is the best

testimony.
"In conclusion he would like to express to you, your officers and officials, and to all classes of the people of Suakin, his cordial thanks for the loval and hearty reception or his arrival and the hospitality extended to him

CANON DAVIS MEMORIAL.

DEDICATION SERVICE.

The short service held by the Bishop in Jeru salem and the East at 4.45 p.m. on Monday in St. Mark's Church was quite private. It had not been possible to fix the exact hour until the day before, too late to announce it in the "Gazette." The Bishop, who was attended by his acting chaplain, the Rev. Canon Ward, inserted the following special prayers in a shortened form of evening service.
"In the faith of Jesus Christ we dedicate this

nemorial stone, now handed over to the charge of the chaplain and trustees of St. Mark's Church, to the perpetual memory of the Canon Edwin John Davis, M. A., in the church in which he so long ministered. May those who worship here, and face his effigy as they go out from this House of God into the world, bear is memory the example of one whose loving and charitable labours for the good of Christ's poor, should stimulate the spirit of charity in others and whose watchful care of the interests of this foundation of St. Mark's has left to his accessors great possibilities for happy is fluence in the chaplaincy which he served for so long

"Assist us metcifully, O Lord, in these our supplications and prayer-, and in this our of loving memorial, and so dispose the way of thy servants towards the attainment of everlasting salvation, that among all the changes and chances of this mortal life we may ever be defended by Thy most gracious and ready help: through Jesus Christ our Lord. Amen."

The Italian man-of-war "Liguria" is expected to arrive at Alexandria shortly, with the Dake of the Abruzzi, who is on his way home after a voyage round the world.

It is not generally known that the credit for the suggestion of England's purchase of the Suez Canal shares belongs rightfully to Mr. Frederick Greenwood, the first editor of the "St. James's Gazette," whose 75th birthday is to be celebrated by a banquet in London. When an opportunity effered of buying the Suez Canal shares which now form so important a national asset, it was Mr. Greenwood who suggested the purchase to Disraeli Disraeli jumped at it, and the thing was done. The statesman got the kudos, but to the journalist belongs the credit.

Egypt has been from the beginning the background for a career of much distinction in the case of Captain Colin Keppel, who has been recently appointed to succeed Sir A. Milne in command of His Majesty's yachts. During the attempt to relieve General Gordon, in the subsequent rescue of Sir C. Wilson under Lord Charles Beresford, on the Nile in 1898, when he commanded the flotilla, and at Omdorman when he gained the D. S. O. and the C. GROSS CRUELTY TO BIRDS.

To THE ENTRON OF THE ENTITLING CARRITE. Sig.,—I wish to bring before the notice of your readers a most distressing case witnessed by a party of four from this house on Sunday, the 26th inst, when returning from the Eurage on No. 1 of the Tramways Co.'s steamboats. A native had oaught about 40 young sparrows and tied them by the legs to a pione of tiring about 2 feet long. To get the brids within this limit they were packed all could not of the string, only the heads and breasts appearing, these looking like a solid column of curvering life. The string was tied to tightly that in some cases the brids in stringling had severed their legs, others, more timit, had died. Over this mass of life and death a coved was gloating and bargadning for the brids, and ahould one be too weak to move, it was thrown out to dozon.

was gloating and bargaining for the birds, shat should one be too weak to move, it was thrown out to diown.

We obtained the lot, and liberated them. About two-thirds reached the banks, some minus a leg, and the root had either died, or were too weak to sustain their flight and fall into the water.

Should such a thing be tolerated ! We ara, I think getting beyond the barbaric age, and I, for my part, will do my best to prevent a recurrence of such a gheatly sight, if it were only for the mute sppeal of the birds themselves, and not considering the "ascendancy" of man, which is only too obvious in this case. I do not know whether a law crists relating to this, as if I had been sequainted with it, the offenders would have been treated differently. — I am, etc.,

THE DEADLY MOSQUITO.

ANTIKITO CREAM

This wonderful proparation—which is most delightfully refreshing to use—is the stoome of long laboratory research. During the last five years it has been thoroughly tested, all parts of the world. By its use the fatal mosquito, as well Ast FLEE, grants and all ring insects, are set at definere. It is shoultely infullible as a preventive, and is guaranteed be free from actionic and other delaterious inguidents. It is institute "stelly or gravey, at one application to the exposed parts affords protection for hours. Invaluable for hospital, and should be in the list of all arpeditions. It is better than Quinter. Protects you
